## REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: Application serial no. 10/768,869 is being allowed since none of the prior art of record teaches or fairly suggests a method for determining whether a given oil will form a water-in-oil emulsion that is unstable enough to undergo a desalting and demulsifying process comprising the steps of measuring for the oil the weight fraction of the oil that is most strongly adsorbed on a silica gel column that is successively eluted with n-hexane, toluene and a methylene chloride-methanol mixture, and determining whether the weight fraction is greater than about 0.05, wherein a value above 0.05 is determinative of an emulsion that is more stable than one with a value less than 0.05. None of the prior art of record teaches or fairly suggests making a correlation between the weight fraction of an oil adsorbed onto a silica gel column that is successively eluted with n-hexane, toluene and a methylene chloride-methanol mixture, and the stability of that oil in a water-in-oil emulsion.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

2. The oath or declaration is defective. A new oath or declaration in compliance with 37 CFR 1.67(a) identifying this application by application number and filing date is required. See MPEP §§ 602.01 and 602.02.

The oath or declaration is defective because: The declaration states that the inventor is a joint inventor. However, there is only one single inventor, Ramesh Varadaraj, listed on the declaration.

Art Unit: 1743

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Please make note of: Varadaraj (US 6,555,009 and 7,108,780) and Varadaraj et al (US 7,008,536), which teach of different methods for demulsifying water-in-oil emulsions.
